# Connecting to the VPN

Android Instructions

Step 1: Download and install the OpenVPN Connect app using the Google Play store

You will have to accept the permissions, and so on

Step 2: Save the .ovpn email attachment onto your SD card

When I click "save", it goes to my SD card automatically. Your mileage may vary.

Step 3: Go to OpenVPN Connect Program, Import Cert

Use the options button -> Import, Import Profile from SD Card, browse to the .ovpn profile you saved

Step 4: Enter Username & Password and Connect

You will need to accept the "I trust this application" dialog. After you connect you will have a key and OpenVPN "O" symbol at the top to let you know you're connected
